WORLD WIDE ORGANICS

**Biobizz World Wide Organics was founded in 1992**, even though the idea of these 100% organic products was developed even before that, in the Netherlands' cannabis scene in the '80s.

From a small family farm, to being present in more than 70 countries around the world, a close-knit Team and a strife for quality and sustainability have been the common factors in more than three decades of history.

**Now, it is time to continue working to create the best 100% organic nutrients and substrates for plants. Let's continue growing together!**

---

# About **Biobizz**

# Interview with Luis

Biobizz is inseparable from its CEO, Luis Pinheiro. He is the soul of the company and represents its philosophy every day. Thanks to a few questions we can see the nucleus of this company and catch a glimpse of the values it represents.

## • How did you become a part of Biobizz?

Before getting into Biobizz, I had an IT consultancy agency in Amsterdam. I met Biobizz in a professional event in Groningen, in the Netherlands, which is its official birth place, even though its history began on the capital of Holland.

I connected with the values and ideas of Biobizz and I established a very good relationship with the company and the people that worked in it.

At that time Biobizz was a family business, with a smaller product line, although the product's DNA was already very present. I put my effort and commercial vision to make that organic product that offered excellent results known to the general public.

We developed new products, improved processes, and Biobizz grew and offered profit. In 2002 I became CEO and partner of Biobizz and since then I haven't stopped working every day so that Biobizz is a leading company in the sector.

## • What ideals do you share as a person with Biobizz?

I see Biobizz as a family, and that is one of the most important ideals in my life and in my company. I firmly believe that my employees should feel relaxed and at ease so that they are able to fully explore their talents and become the best version of themselves.

In addition, loyalty is a fundamental element of our DNA, and that translates into employee loyalty to the company and consumer loyalty to the product.

## • Why do you think that organic agriculture is so important?

Growing organically is essential to take care of ecosystems and also to take care of yourself.

## • What would you say is the best part of working in Biobizz?

I cannot say what is the best thing about working at Biobizz, but I do know that every morning I wake up before the alarm clock goes off, and that means that I wake up excited and wanting to start a new day at the company.

## • How does Biobizz' future look like?

Biobizz' future consists in building internally to expanding externally. Our product is not just a bottle with a liquid inside, or a bag with substrate. Our product is also a feeling, it contains the talent of the people who created it.

In the same way that my employees are the best version of themselves in the company, the plants are the best version of themselves when they are grown with Biobizz.

Interview with  
**Luis Pinheiro,**  
Biobizz' CEO

## **BIOBIZZ BRINGS ORGANIC FARMING TO ALL CORNERS OF THE WORLD**

**Biobizz World Wide Organics** is dedicated to the production and export of organic fertilizers ensuring the highest quality of each of the products we create, as well as the result that the grower gets when they use them.

## OUR VISION: **THE EARTH**

Our **philosophy** is very simple: to make organic agriculture reach as many people as possible to minimize the impact we leave on the world we live in.

Since we started making organic products **in 1992**, we have strived to create sustainable agriculture, encourage self-sufficiency, and highlight the importance of using natural products and methods to obtain everything we need.

## OUR MISSION: **FOSTERING SUSTAINABLE AGRICULTURE SINCE 1992**

**Biobizz was born in 1992 in Groningen**, the Netherlands. At that time, it was a small family business, with a smaller product line, but the DNA of the product was already very present.

Since then Biobizz has not stopped growing. **Today we are present in almost 70 different countries**, but the feeling is still that of belonging to a family, because all team members know each other and work together to ensure that Biobizz continues to be a leading company in the sector.

## **CARING FOR PLANTS AND PEOPLE**

At Biobizz we believe that plants' and people's health are equally important. For this reason, our products do not contain any kind of artificial additives, synthetic pesticides, or harmful heavy metals.

**We only use 100% certified natural ingredients** of controlled origin. If a product was grown with Biobizz, not only is it delicious, but it is also safe and healthy for anyone who consumes it.

# **WE KNOW THAT ORGANIC PRODUCTS GUARANTEE THE BEST RESULTS**

Respecting the environment is a matter of vital importance, but at Biobizz we also believe that it is not necessary to give up results in favour of ecology. That's why our 100% organic products guarantee an impressive harvest, both in **quality and quantity**.

Organic farming means making the most of what nature offers us. That translates into an abundant harvest, healthy plants, lush flowers and an intense natural flavour.

# ONLY 100% CERTIFIED PRODUCTS ARE 100% ORGANIC

We have created a line of organic substrates, liquid fertilizers, and substrate enhancers for the most demanding farmers.

Our company has more certificates than any other company in the sector to guarantee the origin and manufacturing process of all Biobizz products. We have worked hard to pass the most complicated tests and obtain the certificates that allow us to ensure our products are **100% organic** and respectful with the environment.

## **THE BEST FOR PEOPLE, WITHOUT ANYTHING HARMFUL TO THE EARTH.**

We believe that it is time for agriculture to leave the laboratory and take roots where it belongs: Earth. Every time you use Biobizz you can be sure that no harmful element will end up contaminating nearby waters or decimating the wildlife in your area while enjoying your healthy plants and abundant harvest.

# WE LIVE **ORGANIC FARMING**

Biobizz not only creates 100% organic products for organic farming. **We also encourage good practices** when cultivating using our products in our own greenhouse.

Near our main facilities is a greenhouse in which we grow vegetables and some fruits, encouraging self-cultivation and making sure that our crops are always clean, 100% organic and respectful with the environment.

This greenhouse is just one of the many quality controls that our products pass through. It is a way to put all our knowledge into practice and see our products work at their best.

The crops that we obtain are the best way to close the circle, from the ingredients of our products to the ingredients that come to our plates.

## OUR OBJECTIVE

The objective of Biobizz has always been and will be to promote organic farming and offer growers **the best results** thanks to 100% organic products.

Currently, the **Biobizz headquarters are located in Bilbao**. In this location, most of the administrative departments are located, such as Finance, Marketing, or Logistics, as well as the main production plant for our products. In addition, we have offices and auxiliary warehouses in Barcelona, the Netherlands, and the United States.

These facilities, together with our Sales Department, allow us to have a presence in **70 different countries around the world**. Biobizz products can be found in almost every country in Europe, North and South America, and other countries, such as South Africa or Australia.

## OUR PROJECTS: **RESEARCH AND DEVELOPMENT.**

### **TECHNICAL COLLABORATION WITH THE BASQUE INSTITUTE OF AGRICULTURAL RESEARCH NEIKER.**

Biobizz never stops growing and evolving. It is in our DNA to do our best to improve our company every day, both internally and externally.

BIOBIZZ and NEIKER sign a two-year collaboration to continue innovating in R&D in the sector of ecological agriculture.

Biobizz World Wide Organics partners with the Basque Institute of Agricultural Research Neiker in order to continue working on innovating within the ecological agriculture sector, the creation of new products, and development of new growing techniques.

Neiker is a centre of agricultural research dependent of the Basque Government. Since 1851 this centre carries on research tasks in the field of endangered species protection, control of agriculture and cattle industry, and promotion of the competitiveness in the sector.

Biobizz is a leader company in the sector of natural nutrition for plants that has chosen Neiker as a partner in this ambitious project. In this way, Biobizz emphasizes the investment in Research and Development of new products, quality assurance, and innovation in the sector of 100% organic fertilizers.

Some of the fields in which this technical collaboration will focus on are:

- R&D development.
- Analysis, results, and comparative studies.
- Research of organic vs conventional fertilizers.

- Study of performance in different growing media.
- Encouragement of organic and sustainable agriculture.
- Development of new products and solutions for the organic grower.
- Quality assurance in products and techniques and processes.

This collaboration begins on July 15th, 2020 and will have an initial duration of two years, which can be extended after the termination of this period.

Thanks to the support of this official organism, Biobizz continues developing novel and original solutions for the professional growers that seek to get the best performance and quality in their grow without losing the organic essence and the care for the environment.

# Our ecological Certifications

## CONTROL UNION CERTIFICATIONS, NATIONAL ORGANIC PROGRAM (NOP) INPUT

**APPROVED INPUT:  
National Organic  
Program NOP**

Agricultural products that are sold, labelled, or represented as allowed for use on organic operations must be produced and processed in accordance with the Control Union Certifications Standards based on **the National Organic Program (NOP) of the US Department of Agriculture.**

Control Union Certifications [CU] has inspected Biobizz products and found them to be in accordance with these standards. Control Union has certified Biobizz products as an input allowed for use on organic operations.

Products labelled as **'100 percent organic'** may only contain organically produced ingredients and processing aids, excluding water and salt. Agricultural products labelled '100 percent organic' cannot be produced using excluded methods, sewage sludge or ionizing radiation.

## CONTROL UNION CERTIFIED **EU**

Control Union is an international organisation for organic production inspection and certification throughout the world at a global level. It's in accordance with standard ECC Regulation No. 271/2010.

This organisation guarantees that certified products **do not contain any chemical fertiliser or pesticide**, chemical or synthetic flavours, colours or preservatives, or genetically modified organisms [GMO].

## Our ecological **Certifications**

---

### GOOD QUALITY **SOIL MARK**

The Good Soil Quality Mark is an independent inspection mark for potting soil, soil improvers and fertilisers that guarantees product quality and ensures safe, contamination-free products. To make the grade, products must conform to strict requirements that apply to all raw ingredients, the production process and the final product.

### POINT VERT

**The Point Vert symbol** is used on packaging to show that the producer contributes to reducing the environmental impact of product packaging. Also known as the Green Dot, **the Point Vert was founded in Germany in the early 90s** to help educate people about environmental pollution caused by waste and to create a programme to help the environment recover.

The programme is financed by companies contributing when they register to use the Green Dot or Point Vert. **Biobizz not only produces organic fertilisers, we also care deeply about contributing to a better environment in any way we can.** So naturally we're registered under the Point Vert certificate and you'll see the little green logo on all our product packaging.

## Our ecological **Certifications**

---

### **OMRI**

**For Organic Use**

The Organic Materials Review Institute (**OMRI**) is an international non-profit organisation that determines which **contributions are permitted for use in organic production and processing.**

OMRI's staff is managed by a Council of Directors, which is widely representative of the organic industry: assessors, farmers, suppliers, processors, traders, consumers' organisations, and animal and environmental protection groups. Products from the OMRI list are **suitable for use in foodstuff processing and organic production.**

## CLEAN GREEN CERTIFIED

[cleangreencert.com](http://cleangreencert.com)

**Clean Green Certified is a third-party** certification program modelled on existing national and international agricultural standards, **ensuring environmentally clean and sustainable methods.** It incorporates aspects of the USDA's National Organic Program [NOP] international organic programs and sustainable farming practices.

Products licensed to carry the **Clean Green Certified logo contribute to the sustainability of farming.** The certification is based on processing and handling standards, which certify Biobizz' ability to keep organically, sustainably-grown product separate from product grown with synthetic pesticides. The Clean Green program allows Biobizz to be distinguished from the rest, with a label that stands for legal compliance, consumer quality and environmental stewardship.

# ENVIROGANIC

**The Enviroganic Certification is the highest level of certification from EnviroCann.** It reflects that all Envirocann standards regarding state and local environmental compliance are met and that organic management practices are being used.

In products that are certified, no pesticide residues were detected. The EnviroOganic logo represents **products produced using exemplary practices, organic inputs, and in a manner exceeding current national organic standards.**

After examination in the EnviroCann Material Review Program, this certification was granted to following Biobizz® products: Alg·A·Mic™ Bio·Bloom™, Bio·Grow®, Bio·Heaven™, Fish·Mix™, Root·Juice™ and Top·Max™

**LIGHT•MIX®**

**WHAT IS LIGHT•MIX®?**

If you want more control, Light•Mix® provides the ideal foundation for encouraging vigorous growth in seedlings, young plants and cuttings – right from the beginning. It gets the vital micro activity going as the water works with the soil, producing organic catalysts that rapidly develop root structures. Light•Mix® has also been specially blended to ensure optimal drainage throughout – an essential property if you use automatic irrigation systems.

**The pH and EC values**

Biobizz® products only contain natural organic elements rather than mineral salts such as magnesium or sulfates that you might find in synthetic fertilizers. This gives Light•Mix® a medium Electrical Conductivity [EC] value. And while its organic elements are impossible to measure, they do have a self-regulating system, which helps maintain the pH values at the correct level.

**ALL•MIX®**

### WHAT IS ALL•MIX®?

All•Mix® literally does it all for you – creating the optimum environment for plants to flourish throughout the year. This heavily pre-fertilized substrate mixture emulates a rich outdoor soil with a full micro active ecosystem. And it's been designed to have enough nutrient-fuelled power to sustain lush growth for a couple weeks, without a need to add any extra fertilizer.

### The pH and EC values

Biobizz® products only contain natural organic elements rather than mineral salts such as magnesium or sulfates that you might find in synthetic fertilizers. This gives All•Mix® a high Electrical Conductivity [EC] value. And while its organic elements are impossible to measure, they do have a self-regulating system, which helps maintain the pH values at the correct level.

**COCO•MIX™**

**WHAT IS COCO•MIX™?**

No, we're not talking about chocolate bars here – but Biobizz® Coco•Mix™ that is probably the best, 100% organic coco coir product on the market. It's made from waste materials left over by the coconut industry, which has proven to be an ideal medium for growing plants. To become this famous substrate, the coco coir matter is first decomposed over a period of time to soften the strong fibres. This is then washed in clear water, dried and shredded to become light and airy Coco•Mix – which contains little moisture and a low pH of 5 or 6.

**How to use Coco•Mix™**

Coco•Mix™ works well plugged into pots as a rock wool replacement for growing all kinds of hydroponic crops – simply fill small pots with plugs of Coco•Mix. It's compatible with all types of nutrients and can be used to refresh All•Mix™ or other soil mixtures and with your usual A+B range to improve aeration. Combine it with Biobizz® products such Root•Juice™, Bio•Bloom™, Top•Max™ and Bio•Heaven™ and look forward to boosting the quality and yield of your plants.

## *Original* **WORM•HUMUS™**

### WHAT IS WORM•HUMUS™?

Worm•Humus™, also known as vermicast, is the final product of decomposed material excreted by the king of the soil – the earthworm. This high quality organic compost is made from 100% pure, organic worm castings that have been stringently lab-tested to ensure they don't contain any farmyard waste, landfill waste or compost. Packed with water-soluble nutrients and bacteria, our Worm•Humus™ is a very nutritious organic all-round soil improver.

### Quality you can trust

The earthworms that make our 100% organic humus are kept on a highly controlled and nutritious diet of rock minerals and organic potato peelings. Combine the worm castings they produce with the natural microbes in the ground, and you end up with the best quality worm humus you can buy.

**BIO-GROW®**

**WHAT IS BIO-GROW®?**

You can apply this liquid growth fertilizer to most types of soil and substrate mixtures. It has **100% Dutch organic sugar beet extract at its base** – commonly known as vinasse. This by-product of turning sugar beets or sugar cane into sugar is created by a natural fermentation process. Starches in the sugar are then treated with enzymes to produce glucose that, along with other

plant nutrients, help produce a rich food source for soil microbes, boosting their populations for a more productive soil.

The natural sugars and potassium in **Bio-Grow®** activate the bacterial flora in the substrate to guarantee you an ample harvest of deliciously sweet fruit.

## Original **BIO·BLOOM™**

### WHAT IS BIO·BLOOM™?

Hoping for exuberant flowers that lead to tasty fruits? Then this complete liquid organic fertilizer, as its name suggests, is what you need. It contains the optimum blend of nitrogen, phosphorous and potassium, along with enzymes and amino acids – all working together in perfect harmony with the soil. Trace elements and hormones of vegetable origin have also been added to help create a strong-stemmed and vigorous flowering plant.

### The nutrients in Bio·Bloom™

Potassium and phosphorus help the buds, calyces and petals to form and grow. Potassium especially, works with the natural rhythm of the plant throughout the day and night which helps trigger the flowering process.

**FISH•MIX™**

**WHAT IS FISH•MIX™?**

This rich infusion of organic fish emulsion from the North Sea, mixed together with extract of Dutch sugar beet helps accelerate the growth of all living organisms in the substrate. It also stimulates the production of microorganisms and useful bacteria in all types of soil and coco-based substrates. And it's good to know that, in keeping with our strict organic farming requirements,

Fish•Mix™ is not extracted with acids or stabilised with BHT (butylated hydroxytoluene) – a synthetic preservative.

Even after a few days of use, it will have transformed poor quality earth into rich, fat soil – full of the natural minerals your plants are hungry for.

**ROOT•JUICE™**

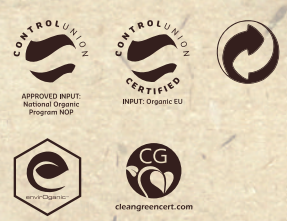

**WHAT IS ROOT•JUICE™?**

Made entirely from vegetable ingredients and designed for organic gardening, **Root•Juice™** combines two amazing natural substances: premium humic acid and seaweed. It's specially formulated to encourage vigorous root development and enhance the natural biological life that surrounds and supports your plant's root system.

Right from the start, **Root•Juice™** helps with the initial roots stage as well as the growth of plants that have already rooted. This ensures the plant is better prepared to absorb nutrients more quickly – resulting in a strong, resilient crop and a guaranteed good harvest for all plant breeders.

Original  
**TOP-MAX™**

### WHAT IS TOP-MAX™?

This 100% organic flowering strengthener contains ingredients that can help increase the actual size and weight of the flower clusters. Nutrient uptake is improved. And plants grown result in sweeter, smooth tasting crops. How it activates the flow of nutrients is essentially down to how it's able to free up the minerals calcium, iron and magnesium in the soil, which stimulate the plant's metabolism.

### The benefits of humic and fulvic acids in Top-Max™

Top-Max™ is incredibly effective because of the

humic acids it contains. The main source of these is the ancient substance Leonardite.

Fulvic acids also possess particular properties that contribute to healthy floral growth. These acids are taken from exceptionally rich sources of humate deposits found deep within the earth. Their natural electrical charge attracts nutrients and minerals present in both the microbiological soil base and applied organic fertilizers. Humic and fulvic acids work together to boost the energy in old plant cells while stimulating new ones to form.

## Original **BIO•HEAVEN™**

### WHAT IS BIO•HEAVEN™?

Your plants will look forward to complete, all-round nirvana with **Bio•Heaven™**. It contains carefully selected biological stimulants, such as amino acids – the basic building blocks for proteins and enzymes that are essential for the plant's structure and metabolism. It improves the effects and translocation of nutrients in all foliar sprays and fertiliser blends. It also gets rid of toxins through boosting the plant's anti-oxidant system and repairs chlorophyll production.

### The Bio•Heaven™ benefits

**Bio•Heaven™** stimulates enzymatic activity and fast nutrient absorption, while increasing the chelate of essential macro and micronutrients. Plants are also better able to retain moisture and experience less humidity stress as a result. **Bio•Heaven™** also provides an outstanding source of carbonic acid for microorganisms in the soil. Ultimately, the crop performs better and you can look forward to a higher quality yield.

**ACTI•VERA™**

### WHAT IS ACTI•VERA™?

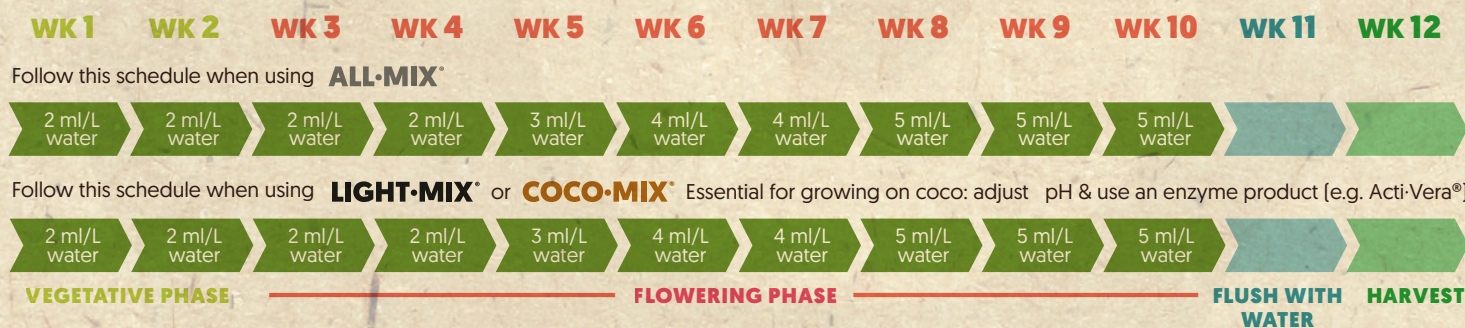

It has been designed to protect the immune system, increase metabolism and enhance nutrient absorption in all sorts of plants.

### Bringing our plants for plants theory to life

Acti•Vera™ makes plants stronger and healthier, both inside and out. It protects and activates the immune system, increases germination and plant metabolism

– breaking down sugars and enhancing nutrient absorption. It really is a super, natural power product for plants – and it's 100% vegan.

The most important difference between our other Biobizz® products that are derived from the ground or sea and Acti•Vera™ is that this organic botanical activator comes 'out of a plant, for a plant'. Or to put it another catchy way – 'plants for plants'!

Original  
**LEAF•COAT™**

### WHAT IS LEAF•COAT™?

Leaf•Coat™ is a ready-to-use product that strengthens and protects plants against unwanted insects and damaging leaf fungi. Made from natural latex that was originally developed to prevent evaporation, it creates a permeable, self-degradable barrier on the leaf, which still allows air and light to get through.

### Why Leaf•Coat™ offers better protection in all conditions

If the atmosphere gets too hot and humid (over 28°C), Leaf•Coat™ helps prevent the plant from losing too much water through evaporation. At the same time, the natural latex layer it forms around the leaves, helps the plant breath and stops it from

‘sweating’. Then when the temperature drops, such as in winter months, Leaf•Coat™ safeguards against the cold by helping maintain the leaf temperature.

As an environmentally friendly alternative to pesticides, Leaf•Coat™ couldn’t be more suitable or safer to use. Reducing the need to use pesticides also saves money. And unlike synthetic and toxic products it has a pleasant smell, and doesn’t irritate. Because Leaf•Coat™ doesn’t get absorbed by the leaves, it doesn’t affect the taste of the fruit either.

## Original BIO•UP

### WHAT IS BIO•UP?

Bio•Up, it has been designed especially for the organic farming sector.

Biobizz Bio•Up is a humic acids based formulation harvested from natural sources, specially designed for the farming sector.

Correcting pH in a natural way is essential for plants to absorb the maximum amount of nutrients. The natural formulation of Bio•Up enables fast pH adjusting of any type of substrate and for any type of crop, without harming the soil micro life. It is designed to work perfectly with the Biobizz nutrients and can be used in every watering. It is suitable to be used during both growing and flowering phase.

### How to use it?

Mix the necessary Biobizz nutrients and measure the pH of the mix. Apply 0,1 ml of Bio•Up to increase pH in 0,1 points. Add the necessary amount of Bio•Up, stir for 10 seconds and measure the pH level again. Keep adding Bio•Up until you reach the optimal pH range of 6.2-6.5 and you are ready to give the nutrient mix to your plants.

### Why choose Bio•Up?

Bio•Up can be used both during the vegetative and flowering periods, in every watering, and in combination with every Biobizz substrate or liquid product.

Bio•Up doesn't contain any strong acids. This means that this 100% organic pH regulator doesn't harm the substrate micro life.

Keep everything organic in the grow, from seed to harvest!

## Original **BIO•DOWN**

### WHAT IS BIO•DOWN?

**Bio•Down**, it has been designed especially for the organic farming sector.

Biobizz **Bio•Down** is an aqueous solution made of citric acid found naturally in different citrus fruits, such as lemons.

Correcting pH in a natural way is essential for plants to absorb the maximum amount of nutrients. The natural formulation of **Bio•Down** enables fast pH adjusting of any type of substrate and for any type of crop, without harming the soil micro life. It is designed to work perfectly with the **Biobizz** nutrients and can be used in every watering. It is suitable to be used during both growing and flowering phase.

### How to use it?

Mix the necessary Biobizz nutrients and measure the pH of the mix. Apply 0,1 ml of **Bio•Down** to decrease pH in 0,5 points. Add the necessary amount of **Bio•Down**, stir for 10 seconds and measure the pH level again. Keep adding **Bio•Down** until you reach the optimal pH range of 6.2-6.5 and you are ready to give the nutrient mix to your plants.

### Why choose Bio•Down?

**Bio•Down** can be used both during the vegetative and flowering periods, in every watering, and in combination with every Biobizz substrate or liquid product.

**Bio•Down** doesn't contain any strong acids. This means that this 100% organic pH regulator doesn't harm the substrate micro life.

Keep everything organic in the grow, from seed to harvest!

**CALMAG**

**WHAT IS CALMAG?**

Biobizz **CALMAG** has been designed for the professional grower and the hobbyist that needs an extra of Calcium and Magnesium in their grow.

Calcium [Ca] and Magnesium [Mg] are essential elements for proper plant growth and blooming, as they play a key role in cell production and photosynthesis. Ca/Mg deficiencies are common, as in today's world we cannot rely on tap water to ensure correct mineral concentration.

Either if you need to stick with soft tap water or go down the RO path, Biobizz **CALMAG** brings you a 100% organic and certified solution for Ca/Mg deficiencies.

This product brings the best of our 100% natural ingredients and presents them in a formula that will not alter your preferred feeding regime.

Correct faulty water and deficiencies in an easy, controlled, and natural way with Biobizz **CALMAG**.

**How to use it?**

- Add the recommended dose of **CALMAG** to supplement Ca and Mg and prepare your water.
- Mix the necessary Biobizz fertilizers.
- Adjust the pH of the nutrient mix.
- Carry out the watering.

We recommend to use our Calmag supplement **every watering when growing with RO or very soft water** or once a week in case of noticing Ca/Mg deficiency signs

**FUNCTION**

# *Original* **MICROBES**

### WHAT IS MICROBES?

Biobizz Microbes is a complete consortium of microorganisms, enzymes, and beneficial fungi that stimulates the process of germination and initial seedling growth, and helps the flowering stage. It improves the flow and uptake of essential nutrients as well as the final yield.

This microorganisms consortium has great benefits for the plant rhizosphere, increasing the useful surface of the roots. This translates to a higher and better absorption of nitrogen, phosphorus, potassium, and micro nutrients during all the development stages of the plant. Moreover, the chosen microorganisms are great promoters of phytohormones, like indole-3-acetic acid and gibberellins.

### BACTERIA

Biobizz Microbes is a superconcentrated product. It contains a selection of 4 of the most beneficial bacteria for recovering substrates. These bacteria improve the vegetal nutrition process, hormone promotion, root tissue growth, and solubilization of nutrients like phosphorus in its greatest proportion. This translates into an increase of productivity and yield quality.

### ENZYMES

The enzymes in Biobizz Microbes have an instant catalyzation effect of organic nutrients, creating free amino acids in the growing media and therefore increasing the activity and effect of the active microorganisms.

These components **“unlock”** the protein chains provided by the fertilizers.

In this way, the enzymes increase the colonization speed of the substrate microorganisms, as well as the quick catalyzation of nutrients for their quick absorption.

Therefore, enzymes are the perfect complement for the beneficial substrate microorganisms, creating a healthy and productive ecosystem.

### TRICHODERMA

Trichoderma fungi are the organic grower's best friend when it comes to increasing the health and productivity of the plants.

These fungi work in symbiosis with the plant; protecting against harmful pathogens and fungal growth, whilst promoting abundant root development, water

# MIX OF MICROORGANISMS

# Products

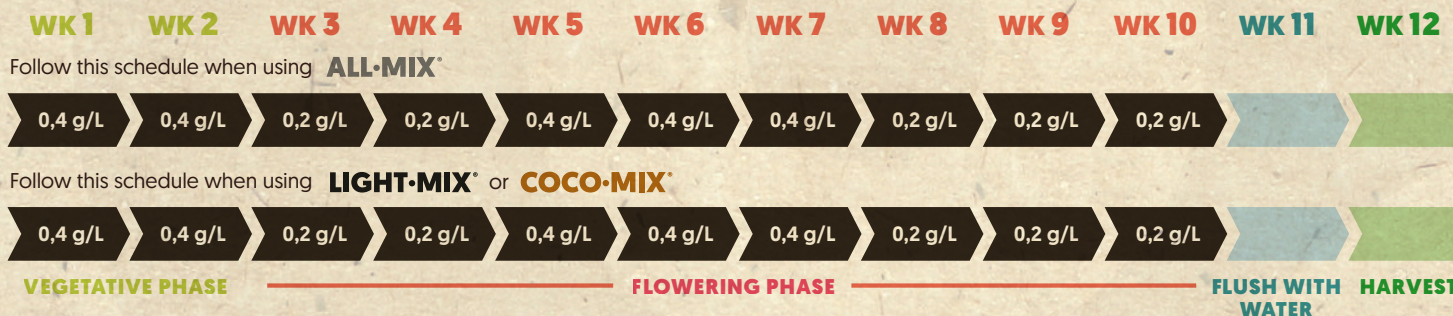

retention and nutrient uptake. Improving the overall efficiency of the grow.

The combination of all these elements in a handy and easy to apply format is the perfect tool for the grower to guarantee an improvement and increase of the final yield properties and quantity.

### How to use it?

- Prepare the water.
- Mix the necessary Biobizz nutrients.
- Regulate the pH in a 100% organic way.

- Add the recommended dose of Biobizz Microbes Powder. Weigh the exact grams per watering, add to the tank, let dissolve, and mix for about 2 minutes.
- Carry out the watering. This product is formulated for weekly application. It can be applied twice a week in periods of high nutrient need in order to facilitate the NPK uptake process [weeks 2-3 and 5-6].

**Microbes:** Application once a week. Twice a week during high nutrient demand in growing and flowering stage.

## MARKETING **TOOLS**

Biobizz wants to help you get to know our product range and also promote it among your network of clients and collaborators.

For this reason, we have prepared a set of promotional tools that we put at your disposition whenever you need them. This set is formed by high resolution product pictures, ready-to-use social media and online content, and other interesting digital materials that you will find in our Dropbox folder.

You can very easily request access to this folder at any time. You just need to send us an email to [info@biobizz.com](mailto:info@biobizz.com).

Moreover, do not hesitate to contact us in case you wish to carry out any kind of joint action between Biobizz and your company or if we can help you with a personalized design. **Our Team is at your disposition via email ([marketing@biobizz.com](mailto:marketing@biobizz.com)) and social media (@[biobizzww](https://www.instagram.com/biobizzww)).**
